

# Accelerating Equity Creating Lasting Change

## Who we are

We are a minority-owned management consulting firm focused on accelerating equity and creating lasting change. Our corporate culture is guided by the South African principle of Ubuntu, which has been translated as "I am because we are" or "humanity towards others."

At BCT, we also believe we are better when we work as a team. That's why we are pleased to announce our acquisition of Community Science, a renowned research and evaluation firm that shares our mission and values. **Together, we are better.**

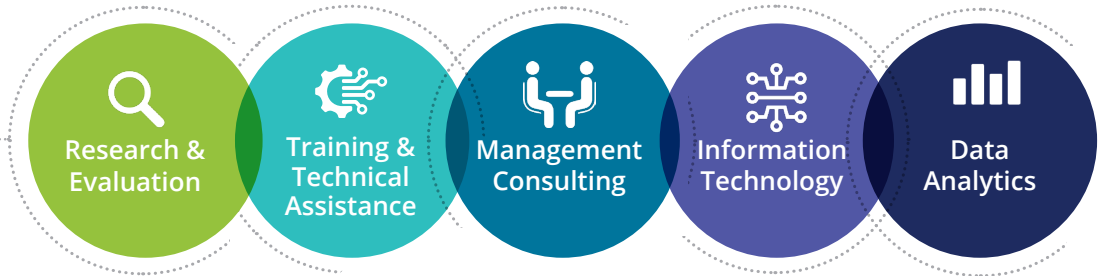

## What we do

We solve complex social problems through a multidisciplinary approach that combines domain expertise, research, evaluation, technology, organizational development, and a passion for change.

## How we do it

We combine services with cutting-edge technology and subject matter expertise to create holistic solutions. Whether it's using virtual reality to mitigate unconscious bias or creating a big data platform to help clients optimize the performance of their social programs, BCT enables our clients to achieve lasting results.
